

For our international team, we are looking for an:

AGRICULTURAL ECONOMIST / FARM SPECIALIST (m/w/d)

Location: Kiel

The IFCN - Dairy Research Network - is an internationally operating research company, cooperating with researchers from around 100 countries and serving another network of over 140 companies in the global dairy chain.

What will be your tasks?

- Dairy farm and market analysis and output creation
- Participation in international consulting projects
- Working with public and private sector clients
- Desk research & data modelling
- Field data collection and international travel may be required
- Presentation of results
- Project Management
- Support of the global farm data collection:
 - Data collection, validation, development of databases and analytical models
 - Communication and cooperation with research partners

What do we expect from you?

- Bachelor or Master degree in agriculture/dairy science, agricultural economics / sciences or any other related study
- Knowledge of different dairy production systems around the world
- Ideally, practical working experience on dairy farms in different countries
- Knowledge in agricultural economics (both at farm and sector level)
- Strong proficiency with Microsoft Excel and PowerPoint including advanced functions
- High level of logical / analytical thinking and self-organization in your work
- Team player and intercultural competence
- Good command/good working knowledge of English (our main language)

Assets:

- Knowledge of the agricultural / dairy market will be seen as an asset
- Work experience in a related field will be seen as an asset

What can IFCN offer?

- A great working atmosphere in a multicultural team
- A high degree of personal responsibility
- Flexible working time, possibility to do home office
- Internal trainings
- Personal development possibilities
- Participation in IFCN events and international conferences
- Social events
